BarTender connecter for D365

Provide data point(s) to **BarTender** from **Microsoft Dynamics 365 Applications**

Are you weary of manually exporting data from Microsoft Dynamics 365 Applications into your label software?

Do you wish to send data from Dynamics 365 Applications straight to the labeling software and start printing labels and barcodes?

Microsoft Dynamics 365 Applications customers who require custom label formats with automated printing want an answer that will ensure automation, flexibility, and accuracy.

The BarTender connecter for D365 directly connects your data in Microsoft Dynamics 365 Applications to best-in-class labeling software, or a smooth one-click printing solution.

Simple

Initiate printing of labels from inside D365 Applications with one click.

Seamless

Transfer label data automatically from D365 Applications to label designing software.

User-defined Data

Map data in D365 Applications to fields on the label for complete control of label design.
