Our Services

Bank Payment File Encryption

Automatically encrypt payment files generated from the Payment Journal & ER formats before export. Meet data protection requirements with ease.

Native D365 Integration

Microsoft Dynamics 365

Works directly within your standard payment processes. There're no external tools required, seamless experience for your finance team.

Compliance & Audit

Supports AES-256 & RSA standards aligned with GDPR. Maintain a full activity log for every file encryption & transmission event for total transparency.
